A HEALTHER BUSINESS TONE.

It is not surprising to be note that there is a much healther business time throughout the "I, Toll in Thise in particular the "feetis in solv from optimistic. We say it is not surprising because Just this was to have

The thing we call business is the reaction of suman energy. People remain losetive just so long, waiting for something Intangible to happen. Men suspend their activities in the apparent belief that at a certain time something is to happen after which business will be hetter. Just what it is that is to happen or what it is that is to cause this undefinable thing to happen nobody seems to know. It is a bad time to undertake to do anything because Tom. Bill and Sam are not doing anything.

After a time it gradually dawns on the Individual that if anything is to happen some human being must make it happen. Finally it is realized that even under existing circumstances and conditions it is possible to not only live, move and have a being, but likewise possible to make a turn with profit. So the individual embraces the opportunities constantly at hand, suits his actions thereto and employes somebody to aid him in the undertaking he has in mind.

What one individual does or thinks under a given set of circumstances many individuals think and do. Thus you have the beginning of business activity and industrial prosperity. That is precisely what is taking place now. At last people are adjusting themselves to the new standard of values. They are setting about doing something for themselves. Therefore something is beginning to happen. Therefore business is looking up. Therefore there is a healthler tone all around. Therefore an era of prosperity is dawning. Such is the psychology of the case.

It is not dollar-oil or eighteen-cent gasoline or fifty-cent corn or present-priced cotton that hurts. Recause such prices have prevailed before with abounding prosperity resulting, because it has not been long since the health of the oil man's ambition was for dollar oil, the farmers for dollar-wheat. The thing that hurtand hurt deep was the shrinkage in values.

When shrinkage occurs (and it does occur always when conditions require it) it is unfortunate that somebody is caught holding the sack. The man in possession of the property when the shrinkage in values occurs feels with justice that he is badly used. He sees a very substantial part of his equities wiped out through what he imagines is no fault of his And he excludes enough gloom to darken the entire landscape in his particular section. But even though he has lost terrifically be-

cause his commodity, whatever it may be, constructed of various high-priced commodities. has shrank over night, the fact is not allered that after the shrinkage has extended to all the various commodities others can deal in precisely that same product at a profit and so

Dollar oil is a calamity, not because all cannot be produced at a handsome profit when the various costs of producing oil are all based on dollar-oil, but because the 75 per cent shrinkore represented in dollar-oil has inflicted vast losses on thousands of people. With labor, sized practices, dimension timbers, transportstion, or time roots, etc., all adjusted to the dollayout turns, emerge-almount of percologic will he proportionable as profitable as it ever was Such read summons made occurs tone. NEW YORK'S CENSORSHIP LAW.

New York has finally decided to set up a board of motion pleture rensers. The idealists, reformers and sun-baked comordate have managed to score once more. The idea seems to persist that governmental agents are drawn from some source of samply passessing silver riorities over the great mass of citizenship, ig-

CONSCIENCE OR WHAT?

Benjamin Miller, an official of a large chain store organization, in announcing a 50 per cent reduction in the price of candica sold by his concern, the reduction applying to every kind of candy from gumdrops to bonbons, transmitted a letter to the National Confectioners association in which he said:

"It's time we got down to reason in this matter. We have been making not 100 but 300 per cent profit for a long time. This kind of business, if kept up, would create a panic.

Then it is possible for profiteers to become ashamed of themselves? However, it is an parent that the break comes from a member of the trade organization rather than from the organization itself or its head. Probably many numbers of the National Confectioners' asseslatten will complain loudly that one of their number turned state's evidence. But now that the cat's out of the bas the communing public gets a glimpse of what has been going on.

"We have been making not 190 per cent but 300 per cent," writes Mr. Miller at the confessional. Then after taking the 52 per cent teduction proclaimed the line of profit remains 150 per cent. Isn't that still heavy for a leastimate business, Mr. Miller, especially one that is making a gesture of squarting liself with pub-

And now this morning I read with pleasure the hard-holled answer Hamilton passed out to the two hard-up buddles. It strikes me right. Jack is a stratiger to no, but I'd take pleasure in meeting film. The way he seeks it into these inches needs gives me jus. If we had more men like Jack, and fewer like O'livyan and known, who want semething soft passed to them in condensed form, to be digosted without effort, the country would be tetter off. I'm with Jack to the limit. If a man was burt take eare of him in the bore minner possible; give him duck to the limit. If a man was hurt, take care of him in the best manner possible, give him every opportunity to get back on his feet, but if he came back all well and in one piece, then let him hit the ball, and came that yowing for a berns. If he isn't proud that he went, and can't get his satisfaction out of the knowledge that he served well then let him crawl off into some dark corner and keep his silence. Sincerely yours.
